

**Children's Liver Disease Foundation
Professionals Leaflet & Pack Order Form**

CLDF is funded almost entirely through voluntary donations. Our educational/information services include the provision of a range of literature designed for families and young people with a liver condition or have had a transplant.

Literature in the medical, nutrition and CFacts series and CLDF introduction packs are provided free of charge to specialist paediatric liver centres and units in the UK caring for children with liver disease. However, there will be a donation request to any other medical institution or other organisation requiring multiple orders, to help towards the cost of future printing requirements. Details are below.

Please use the form below to place your order. Payment must be made with your order. We do not have a facility to raise invoices.
